

## THE VEITH SYSTEM PIN-TABLE FOR FLAT-KNITTED FABRIC

This Pin-Table has specially been developed to spread flat-knitted fabric in lays up to 9 cm deep, i.e. instead of single ply cutting now cutting of high plies is possible. It represents the result of a creative cooperation of the **VEITH SYSTEM** specialists with well-known users.

The flexibility of the **VEITH SYSTEM** PIN-TABLE for FLAT-KNITTED FABRIC allows a very economical spreading of even most complicated and exceptionally designed models. With this system it does not matter whether symmetrically or asymmetrically designed models have to be layed up.

This **VEITH SYSTEM** PIN-TABLE uses special **NEEDLE BARS** which a single person may handle easily. The **NEEDLE BARS** may be set at any position, entirely independent of any grid. Even a later adjusting movement of the **NEEDLE BAR** with a pinned lay on it can easily be done. The table is equipped with a measure, thus allowing a very exact work. Each **NEEDLE BAR** has 7 needles, and each needle may be switched on or off independently.

The height of the needles may infinitely be adjusted by means of a handwheel, thus the needles are coming up continuously with the growing lay. The adjustability of the height of the needles represents an important help for a quick and safe pinning operation.

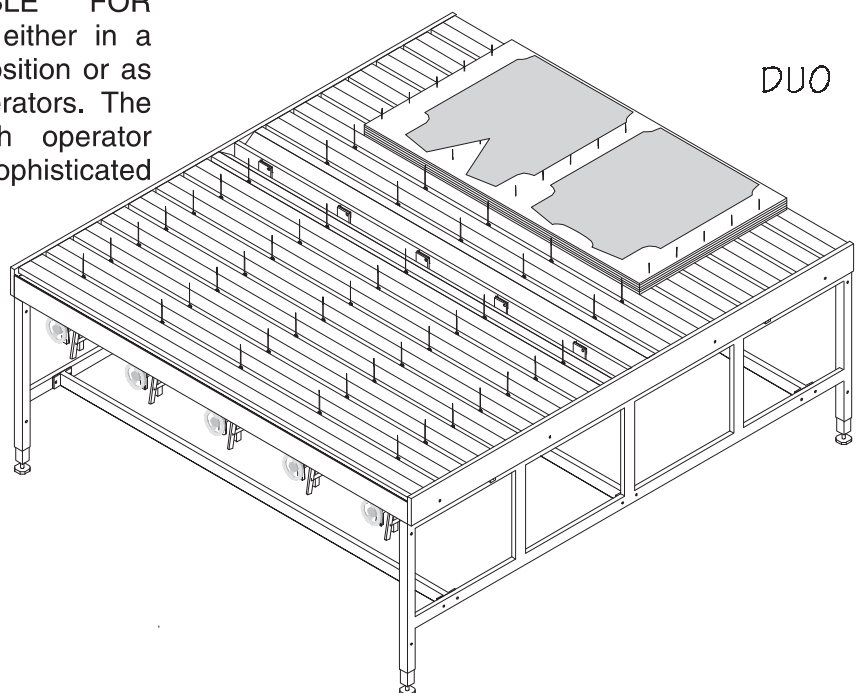

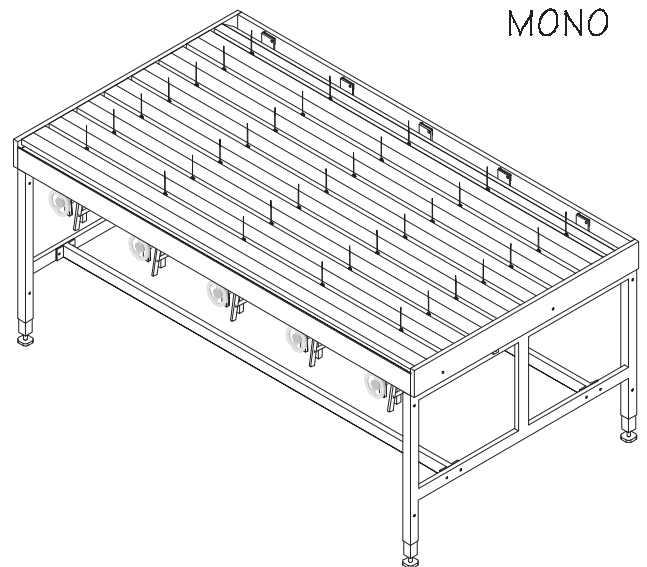

The **VEITH SYSTEM** PIN-TABLE FOR FLAT-KNITTED FABRIC is available either in a mono-version as a single operator's position or as a space-saving duo-version for 2 operators. The basic equipment provides for each operator position 5 **NEEDLE BARS**. For more sophisticated requirements additional **NEEDLE BARS** may be installed.

The application of the **VEITH SYSTEM** PIN-TABLE FOR FLAT-KNITTED FABRIC offers the following convincing advantages:

- **Cutting of flat-knitted fabric in deep lays**
- **Saving of working time up to 35%;**
- **Reduced transit times;**
- **High quality standard;**
- **Quick training of unskilled labor;**

and as a result of these advantages:

- **a short period of the return of investment**

### MONO

Length 204 cm  
Width 114 cm

### DUO

Length 204 cm  
Width 226 cm

Height adjustable 80 - 90 cm
